Press Release

Date: Apr-02, 2019

Blood Donors of America, BDA, is deeply saddened by the devastation caused by the deadly typhoon on March-31, 2019, especially in Bara and Parsa districts in Nepal. According to the official data, 27 people have lost their lives so far and hundreds are seriously injured. May the departed souls rest in peace. Moreover, our thoughts and prayers are with the diseased families for the speedy recovery of their loved ones.

BDA would like to work together with BLODAN to help save more lives of the typhoon victims via blood donation. BDA urges the federal government of Nepal, state government of the province no. 2, and the local governments to coordinate each other to intensify the rescue operation of the victims and provide free and quality health care.

Thank you.

Regards,

.....
Dr. Lila Raj Dahal

President, BDA
